How Does Ageless Knees Work?

Ageless Knees focuses on the underlying cause of knee pain, which starts with the femoral nerve. This nerve, running from the lumbar spine to the leg, supports walking and squatting. Over time, the femoral nerve weakens, and its signals become blunt due to lifestyle changes.

The program includes movements that activate the femoral nerve, strengthen the quadriceps, and stabilize the knees. The Massage Wand releases electric currents into the body, reducing knee pain and improving the connection between the femoral

nerve and quadriceps. This increases blood flow, reduces swelling, eases muscle tightness, and speeds up recovery by eliminating inflammation.
